

GUARDINI

Gold Elegance, timeless elegance in golden tones of bronze and champagne.

For all lovers of timeless elegance that goes beyond fashion, Guardini has created a line that is always in vogue, that does not follow fashion trends, but sets them! The range of golden colours with its **bronze-coloured** exterior and **champagne-coloured** interior, is the epitome of elegance ...**Gold Elegance** is its name and it combines elegance with the great quality of materials that makes it possible to bake in the oven sweet and savoury dishes without any risk, for excellent cooking and unmoulding.

Gold Elegance

La passione prende forma.

In the context of a process of brand innovation and communication that we have started a few months ago, the first novelty in this line, which focuses more on design than on functional innovation, is the **Gold Elegance** line: a collection of traditional baking moulds that offer high performance in terms of non-stick properties and resistance to wear and abrasion, characterised by colours in golden shades, which have recently become very fashionable both in Italy and in many other European countries.

The **Gold Elegance** line will have a medium-high positioning, because it is provided with a high quality non-stick coating and with an elegant aspect, like its "twin" Silver Elegance, which has been distributed on the Italian market for some years now.

In fact, the moulds in the range are made of non-stick coated steel, free of BPA, PFOA and heavy metals. The top quality coating withstands temperatures up to 230°C and provides excellent resistance to scratches and wear.

TECHNICAL DATA:

- **Material:** Hi-Top steel with non-stick coating
- **Outer colour:** bronze
- **Inner colour:** champagne
- **Features:** high quality non-stick coating, easy to wash and wear resistant
- **Where to buy it:** in the online shop at www.guardini.com, in large distribution, in specialized shops.
