

JULIETTE. HEARTS IN THE KITCHEN!

It has a very romantic and sweet name: Juliette the silicone "heart mould" by Guardini, red passion like the passion you will give your "Valentine", in the kitchen too.

Juliette is also the name of a complete line of baking and freezing moulds, completely made of silicone. Flexible and non-sticking, all the cakes or quiches your creativity is able to make will be easy to release. In just a few seconds every cake is released without breaks and damages. Furthermore, the silicone moulds can be stored anywhere without a problem: they can be folded, rolled up or crushed. When you take them out again they pop back into shape.

Juliette moulds can be use with temperatures up to 260° C and – 40° C, they can be used in traditional ovens, microwave ovens, in the refrigerator and freezer. They are easy to clean and are dishwasher safe.

Alchemists of feelings, prepare a recipe with the heart to surprise and conquer even the most demanding tastes.
